Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 28,30,33,34,36,37,39,40,42^{40, ✓} rejected under 35 U.S.C. 103(a) as being unpatentable over Ahlers (5118113).

Claims 28,33,34,39,40: Ahlers teaches a method of playing a game, the method comprising gathering a plurality of players (6:41), selecting the order of play (6:55-56), a player traversing a path (6:56-64) using game pieces (6:61) and die (6:63-64), path having a start and finish spaces (56,57,58,59,60,61), spaces with different groups of categories defined on them (see indicia on spaces for environment, lifestyle and hazard groups), upon landing a player being provided a scenario based on a category (5:21-24) and a player providing a generated answer (think tank), thereby providing an answer provoking thoughts (think tank category), and the answer being based on at least one of a principle (as in related to a household item) from a predetermined principles (as in purchased on a frequent basis).

Ahlers further teaches scoring system where points are accessed by other players, added or subtracted (10:18-19) and tracked (10:18-30).

Applicant might argue that Ahlers does not teach a principle but it teaches a household item. Examiner takes the position that the household items referred to in the cited reference are representative of the principle " frequently purchased items", and in that, a frequently purchased household item will inherently remind/speak of the principle as their reason for selection. One of ordinary skill in art at the time the invention was made

Art Unit: 3711

would have suggested modifying/replacing principles with household items representative of certain principles as a method of reminding those principles.

Claims 30,36: Ahlers teaches at least one other player voting/rating the player in turn (5:27-28).

Claims 37: Ahlers does not expressly indicate the game being used by parents, children, adults and participants in the workplace. Ahlers however indicates that the invented game can be optimized to accommodate all skills and levels. Looking at categories such as environment, hazard and lifestyle, it would have been very easy and entertaining for all levels and skills of people. One of ordinary skill in art at the time the invention was made would have suggested using the Ahlers game by people of all skills.

2. Claim 38 rejected under 35 U.S.C. 103(a) as being unpatentable over Ahlers in view of Siegesmund (5882008).

Ahlers teaches all limitations except that it does not teach playing the game on a computer screens. Siegesmund teaches playing a similar game on a computer (5:47-52).

In order to reach a larger section of players, it would have been obvious to place a game on computer/internet. In this day and age playing a game on computer is commonly known and also helps promote a game. One of ordinary skill in art at the time the invention was made would have suggested placing the game on computer media for promoting the game.

3. Claim 41 rejected under 35 U.S.C. 103(a) as being unpatentable over Ahlers in view of Saunders (5295834).

Art Unit: 3711

Ahlens teaches all limitations except that it does not teach tracking time for a response and allowing a limited amount of time.

Saunders teaches each player allowed a limited time to responds to questions (1:50).

Boars games are primarily played for amusement purposes and it is not possible to allow unlimited time to each player. In order to maintain the interest of players, it would have been obvious to allow a limited time to each player. One of ordinary skill in art at the time the invention was made would have suggested tracking allowed time of response for maintaining the interest level of players.

Allowable Subject Matter

4. Claim 43 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 28,30,33-34,36-42 have been considered but are moot in view of the new ground(s) of rejection.
